TECHNICAL SKILLS

HTML5, CSS3, Flexbox/Grid, Javascript, JQuery, React, Redux, Node, Express, MongoDB, MySQL, Git/Github, Heroku, Authentication, Testing, REST, APIs, Responsive Design, Figma, Meteor

PROJECTS

Mark's Body-Works | <https://github.com/Digald/marks-body-works> | <https://markbodyworks.herokuapp.com/> | **Role: Full-stack Developer**

As a work in progress, this full-stack application is a collection of my favorite weightlifting programs all in one place. It's best suited for an intermediate lifter.

- Developed a reactive interface for users to easily compare changes in the application.
- Implemented user authentication so your progress can be tracked on any device from the web.
- Tools: Meteor, MongoDB, React

Skiller-bot | <https://github.com/Digald/skiller-bot> | **Role: Back-End Developer**

A private Discord bot for my friends' personal server. Skiller-bot listens for specified commands and returns various data or information.

- Wrote and still actively develops scripts to perform on request by users of the server.
- Tools: Node, Discord.js

RuneScape | <https://github.com/Digald/RuneScape> | <http://runescape.herokuapp.com/> | **Role: Full-stack Developer**

A web-scraper that collects all the latest news articles from OldSchool Runescape for you to comment and save.

- Acquired data through non-traditional methods to supply my application's needs.
- Tools: JQuery, Node, MongoDB, Express, Mongoose

RangeFront | <https://github.com/Digald/RangeFront> | <https://rangefront.herokuapp.com/> | **Role: Full-stack Developer**

Built as a team, this project is an outdoors themed ecommerce website with a custom MySQL shopping cart.

- Built application structure using the MVC pattern and learned communication between logical components.
- Tools: MySQL, Node, Express, jQuery, Passport.js

EDUCATION

University of Texas, Austin, Texas – Full Stack Web Development Bootcamp

Texas A&M University-Kingsville, Kingsville, Texas – B.S. Geology/GIS, Summa Cum Laude (Honors)
