Full Stack Web Developer able to build a sophisticated website with full database backend all the way from mockup to rollout. Adept at working with diverse teams to implement projects.

TECHNICAL SKILLS

HTML5, CSS3, Javascript, package managers, CSS frameworks, front-end frameworks with React/Redux, Electron, Node, server frameworks with Express/Meteor, RESTful APIs, Relational databases with MySQL and NoSQL databases with MongoDB, version control with Git

PROJECTS

MTGA Pathway | https://github.com/Digald/mtga-pathway | **Role: Full-stack Developer Jan 2019 - Present**
As a work in progress, this desktop application helps new and veteran Magic: The Gathering Arena players focus how to make the most of their current collection by following what competitive decks can be played now or in the very near future.
- Established more efficient ways for players to spend in game currency to meet their gameplay goals with this application.
- Tools: Electron, React

Mark's Body-Works | https://github.com/Digald/marks-body-works |
https://markbodyworks.herokuapp.com/ | **Role: Full-stack Developer**   **Aug 2018 - Sept 2018**
This full-stack application is an aggregation of my favorite weightlifting programs that's geared towards an intermediate lifter.
- Developed a reactive interface for users to easily compare changes in the application.
- Implemented user authentication so your progress can be tracked on any device from the web.
- Tools: Meteor, MongoDB, React

Skiller-bot | https://github.com/Digald/skiller-bot | **Role: Back-End Developer**   **Jul 2018 - Present**
A private Discord bot for my friends' personal server. Skiller-bot listens for specific text commands and returns various data or information.
- Programmed all individual scripts based on specs described by users of our Discord server.
- Tools: Node, Discord.js

RuneScrape | https://github.com/Digald/RuneScrape | http://runescrape.herokuapp.com**/ | Role: Full-stack Developer**   **Mar 2018**
Implemented a web-scraper that collects all the latest news articles from OldSchool Runescape for you to comment and save.
- Acquired data through non-traditional methods to supply my application's needs.
- Tools: JQuery, Node, MongoDB, Express, Mongoose

EDUCATION

University of Texas, Austin, Texas   **Oct 2017 - Apr 2019**
Full Stack Web Development Bootcamp

Texas A&M University-Kingsville, Kingsville, Texas   **Graduated May 2016**
B.S. Geology/GIS, Summa Cum Laude (Honors)

WORK EXPERIENCE

In-Store Shopper – *Instacart* – Austin, TX   **Sept 2018 - Jan 2019**
- Acted as the point of communication for customers who have questions or issues with their order
- Effectively planned the best routes for completing an orders within the allotted time goals.
- Developed personal strategies and standard operating procedures for handling non-ordinary situations while completing orders and handling customer interactions.

Medicaid Contractor III – *Peak Performers* – Austin, TX   **Jul 2016 - May 2018**
The primary responsibilities of my position were involved with getting Texas pharmacies re-enrolled in Texas Medicaid and meet ACA standards.
- Actively allocated resources for multi-tasking was critical, and a valuable skill set that was used while consistently maintaining and moving from project to project.
- Collected and compiled relevant application information and entered it manually into digital storage.
- Collaborated with a group of 4 to escalate deficiencies in the physical applications.
- Performed outreach personally to 3000+ medical providers to inform them about changes in the law regarding requirements to prescribe to Medicaid clients.

Undergraduate Teaching Assistant – *Texas A&M University Kingsville* – Kingsville, TX   **Aug 2015 - May 2016**
- Graded all student submitted lab work and organized the grades to be presented to the lab instructor for reference
- Helped prepare the instructors for lab as well as assist students with questions.
- Corresponded between students and the instructor when communication between the two would break down or be misunderstood.
